Seminole Office Solutions Leverages New Artificial Intelligence (AI) to Protect Small to Mid-Sized Companies From the Latest AI Phishing Attacks

*Leading Managed Technology Services
Provider Helps To Secure
Organizations*

LONGWOOD, FL December 20,
2024 - Seminole Office Solutions a
leading Managed Technology

constantly surveying the company network to track if company data is being improperly secured. For

file78fer

might be storing company files on a personal Dropbox/Google Drive account, which will need to be secured at the same level as other data storage centers. Seminole Office Solutions software can immediately detect if employees are storing company data on unsecured servers/locations and notify network administrators so they can address the issue before the company is exposed to a completely unnecessary breach.
